

**Environmental
Management
System**

DATE	1/2/07	PROCEDURE	EMS-EP
REVISION	3	PAGE	1 OF 1
APPROVAL			

SUBJECT: Environmental Policy

ThyssenKrupp Steel Services (TKSS), a processor of steel has made a commitment to strengthen its environmental obligations. In order to fulfill this commitment, TKSS has implemented an Environmental Management System (EMS), and has established the following objectives:

- TKSS will work to reduce or prevent pollution (Air emissions, Wastewater Discharge, Liquid & Solid Wastes and Material use)
- TKSS will work diligently to comply with all legal and other requirements and to assure our employees work with us to assure compliance to our internal requirements
- TKSS will work to minimize the creation of waste and pollution
- TKSS will work to improve upon our current processes
- TKSS will work to assure the processes employed at this facility have no ill effects on our environment or our neighbors environment

It is the goal of TKSS to assure that we will be responsible corporate partners with our environment, and the public domain.

TKSS will commit necessary resources to assure that the EMS system is successfully implemented, maintained and improved upon on a continual basis. TKSS will review the EMS during Management Review.

Terry Mulholland, Vice President
ThyssenKrupp Steel Services
